

Leopard Class

Year 4/5

Summer

This term we have been on a stimulating journey as we have delved into the captivating realm of the ancient Greeks answering the question: 'How did the Ancient Greeks influence on the modern world?' In our topic sessions, we have uncovered the enduring legacies of democracy, philosophy, and architecture that still shape our world today. We have been immersing ourselves in the world of Greek pottery in our art classes, while considering this ancient art form. Science has electrified our minds as we've explored the wonders of electricity. From Benjamin Franklin's kite experiment to Nikola Tesla's ground-breaking discoveries, we have been in awe by the power and potential of this fundamental force. Under the guidance of Mrs. Wright, our RE lessons has transcended traditional boundaries as we have embarked on a project exploring themes of spirituality and personal expression. Meanwhile, in French, we have learned about our own classroom, discovering and describing the objects that surround us. But this has been the beginning of our exhilarating journey! Together, let's make this term one to remember, filled with growth, discovery, and boundless possibilities.

Looking back at Spring:

Key Dates:

- 21st May Y4 MTC Mock
- 24th May Wear Orange Day
- 27th - 31st May Half Term
- 10th - 14th June Assessment Week
- 18th June Class Worship
